

# The Navigating Care Portal

## Quick-Start Guide

---

Your Navigating Care™ patient portal allows you to view test results, easily communicate with your clinic, keep track of appointments, and learn about topics related to your health — all from your phone, tablet, or computer.

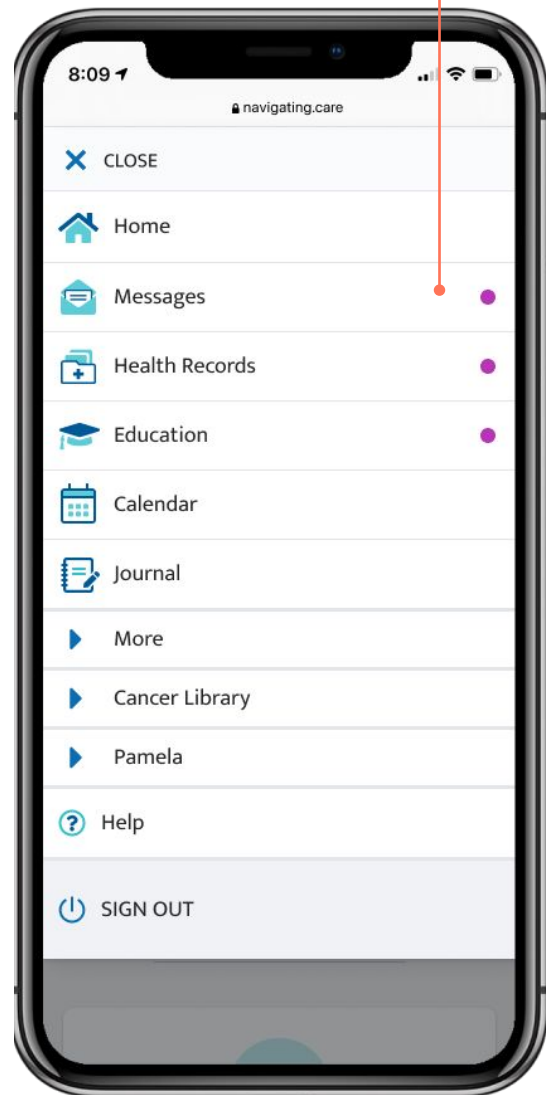

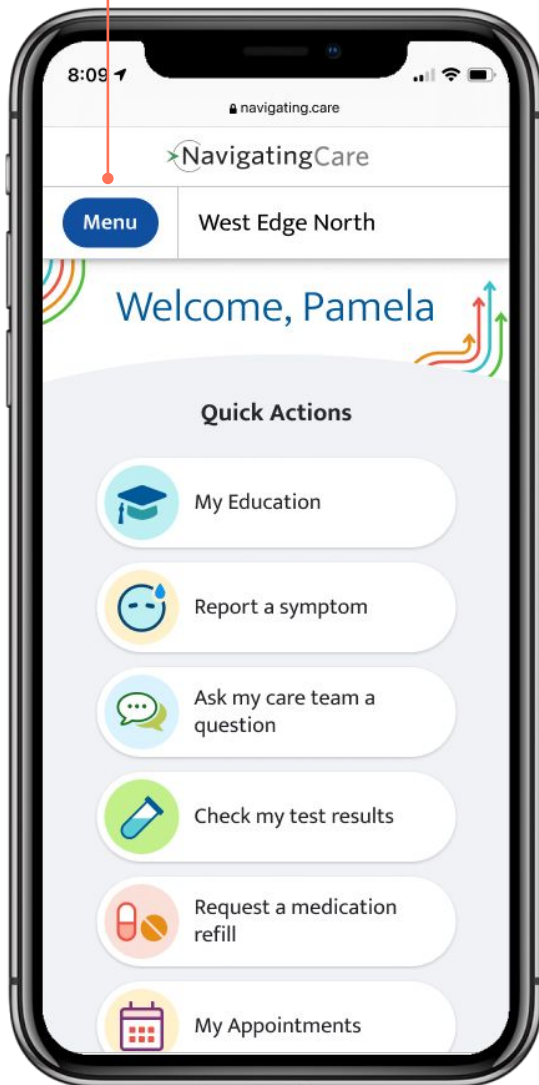

On phones and smaller devices, you can navigate to your portal features from the "Menu" button in the upper left corner of the screen.

## Mobile Overview

**Menu** in the top left opens all navigation options: home, messages, health records, education, calendar, journal, more, calendar resources, account, help, and sign out. The purple dot shows there's new information for you, which you can find by opening the menu.

You can navigate to any portal page from the **expanded mobile menu** by clicking the option you want to see. Options to logout or go to the FAQ and support contact pages are also available here. Select 'close' to collapse the menu options.

## Mobile Overview

**Home** brings you back to your homepage, where you can find your Quick Actions menu and information about your clinic.

Securely exchange **Messages**, photos, and files with your care team for non-urgent issues and questions.

**Health Records** provides you access to your test results, vitals, medications, allergies and more. From there, you can email or print your record.

Read **Education** articles curated for you about your diagnosis and medications from trusted sources, like the National Cancer Institute.

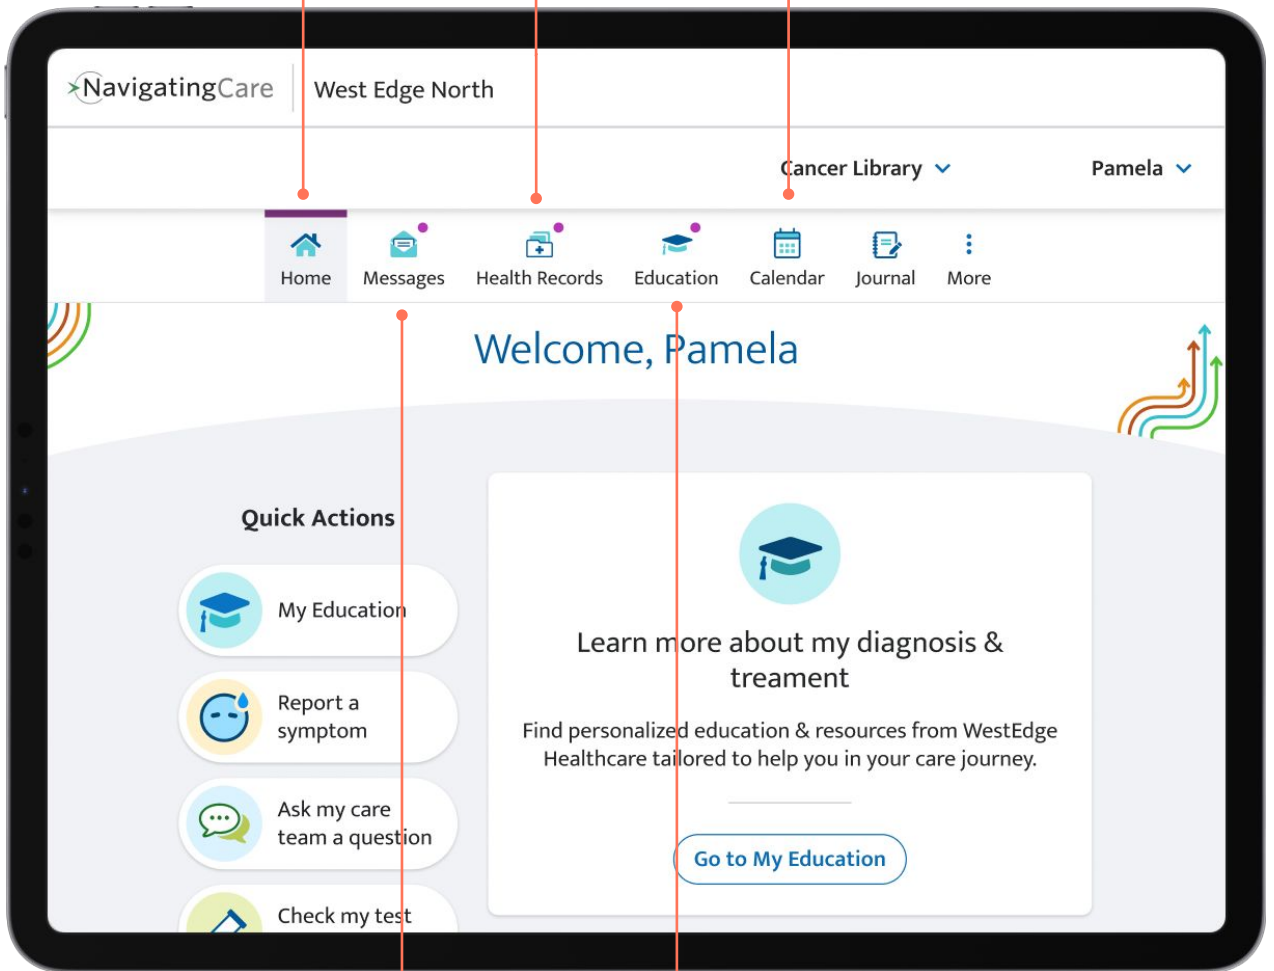

View your **Calendar** for upcoming appointments.

# Desktop and Tablet Overview

**Home** brings you back to your homepage, where you can find your Quick Actions menu and information about your clinic.

**Health Records** provides you access to your test results, vitals, medications, allergies and more. From there, you can email or print your record.

View your **Calendar** for upcoming appointments.

Read **Education** articles curated for you about your diagnosis and medications from industry leaders and trusted sources, like the National Cancer Institute.

## Desktop and Tablet Overview

Visit **Cancer Library** to find helpful articles and trustworthy information provided by American Society of Health-System Pharmacists and National Cancer Institute.

Select **Visits** to view a summary of your previous clinic appointments.

Find helpful information from your clinic's **Resources** section.

To make sure loved ones have access to your health information, add a caregiver under **My Connections**. This is where you manage who can view, download, and share your health records.
